We shall soon initiate preparatory courses for specialized exams for healthcare specialties, administrators, and leaders that aim for professional development, improving performance indicators, reducing waste, and enhancing professional practices, methods, and techniques in accordance with the latest standards in education and training.

KPI's OTLP Mechanism

The methodology of the Medical KPIs company depends on the use of online digital & smart learning & training technology to facilitate latest knowledge update, adaptation of work requirements, and empowering trainees with the specialized competencies in their specialties and support their specialty competencies that help to leverage their professionalism, quality performance and competitiveness.

Tests and Exams

Medical KPI's has taken into consideration the development of tests and/or exams for competency courses that are compatible with the content of each course, so that the trainee must pass the test to obtain the credit hours.

Trainers Concerns

The concerns and feedback of the trainees regarding courses content, training and teaching mechanism, and trainers will have a significant impact on the development and improvement of the OTLP process. Medical KPIs staff, and trainers are looking forward to your feedback and suggestions that will enhance the OTLP programs and process.
